

Louisiana Economic Development (LED) was looking for an expanded solution to accomplish its stated goal of filling 40,000 jobs per year for Louisiana residents and the businesses that LED was attracting to the state. Vinformatix built a seamless solution, including under-the-hood integration with the following key features:

- **Enterprise level web portal with a proprietary user interface**
- **Merging of multiple third-party machine-learning technologies, including complex algorithms to match applicants to opportunities**
- **A high level of reporting capabilities with security to measure effectiveness while safeguarding sensitive user and employer information**

The Results:

- **Over 75,000 users in the system**
- **Over 3 Million matches between job seekers and employers in the state**
